✔ Currently on Stamp 1G Graduate Work Permission — Fully eligible for immediate full-time employment in Ireland

PROFESSIONAL SUMMARY

Results-driven Software Engineer with 3+ years of hands-on experience building enterprise-grade systems in C#, .NET Core, and ASP.NET MVC. Proven track record designing and deploying scalable ERP, HR, and POS solutions with robust database architecture and Windows Server administration. Holds a Higher Diploma in Science in Computing (CCT College Dublin, 2026), with expertise in cloud computing (AWS, Azure), ML.NET, and AI/ML integration. Eager to bring systems-level thinking, a security-first mindset, and rapid learning ability to Microsoft's Update Platform team — directly contributing to seamless, secure software delivery for billions of Windows users.

TECHNICAL SKILLS

Languages	C#, C++, JavaScript, Java, Python, VB.NET, PHP
Frameworks	.NET Core, ASP.NET MVC, ML.NET, DevExpress, LINQ
Cloud & Systems	AWS EC2, Azure Fundamentals, Windows Server, Ubuntu/Linux
Databases	MSSQL, MySQL, MongoDB
Tools & Practices	Git, CI/CD, Agile, Debugging, OpenDBDiff, AnyDesk, Hamachi
Specialties	ERP Integration, Database Optimization, Secure Licensing, Update Pipelines
AI/ML	ML.NET, LangChain (in progress), Azure AI Cognitive Services

PROFESSIONAL EXPERIENCE

Full Stack Developer | Golden Artifact Technology

June 2019 – Nov 2021

Yangon, Myanmar

- Designed and developed enterprise HR, POS, and management systems using C#, .NET Framework, and MSSQL — maintaining high reliability across production Windows Server 2012 environments.
- Implemented secure data synchronization pipelines using OpenDBDiff and Hamachi-based replication, directly analogous to update delivery and versioning challenges in OS update stacks.
- Deployed and maintained software across multiple client Windows environments, gaining hands-on experience with OS-level configuration, patching lifecycles, and rollback strategies.
- Optimised MSSQL database query performance by 40%+ through index tuning, stored procedure refactoring, and schema redesign.
- Collaborated with cross-functional stakeholders to gather requirements, translating complex client needs into robust technical solutions.

Software Developer | Systematic Business Solution

July 2018 – April 2019

Yangon, Myanmar

- Built HR, POS, and ERP systems using C#, ASP.NET MVC, and MSSQL within Agile sprint cycles; promoted to Full Stack Developer within 3 months for exceptional performance.
- Led database migration from legacy SourceSafe to Git, establishing modern version control workflows and CI practices.
- Mentored junior developers on C# best practices, debugging techniques, and code review standards.

- Delivered query optimisation and database migration projects that improved system response time and data integrity.

IT Support Intern | KMD Group of Companies

April 2018 – June 2018

Yangon, Myanmar

- Configured and maintained LAN/Wi-Fi networks and Windows/Linux servers, building foundational knowledge of OS internals and network infrastructure.
- Assisted with hardware/software troubleshooting and PHP development, reinforcing cross-stack debugging skills.

KEY PROJECTS

Smart HR Management System | C#, .NET, MSSQL, DevExpress

- Built a full-stack HR platform featuring AES-256 encryption, biometric fingerprint attendance integration, and automated DevExpress report generation — demonstrating security-first architecture for sensitive enterprise data.

AI POS Analytics System | ML.NET, LangChain, Python — In Progress

- Developing a predictive analytics engine combining ML.NET time-series forecasting with LangChain-powered natural language querying, applying generative AI to real business workflows.

IoT Home Automation System | C#, Arduino, TCP/UDP

- Engineered an Arduino-based smart home controller using C# TCP/UDP sockets and voice command integration — showcasing low-level systems programming and network communication.

Custom POS Management System | C#, ASP.NET MVC, SQL Server

- Delivered a secure, multi-client POS platform with custom licensing architecture and robust session management for enterprise retail environments.

CarePlus Health Clinic Website | HTML, CSS, JS, AWS EC2

- Designed and deployed a responsive clinic web application on AWS EC2, gaining cloud deployment and infrastructure management experience.

EDUCATION

Higher Diploma in Science in Computing (Level 8) | CCT College Dublin, Ireland *Feb 2025 – Feb 2026*

- Coursework: Cloud Computing (AWS & Azure), Data Analytics, Modern Web Technologies, AI/ML Applications

Bachelor of Engineering (Information Technology) | West Yangon Technological University *Dec 2012 – Sep 2018*

- Core studies: Software Engineering, Database Systems, Operating Systems, Computer Networks, Algorithms

WORK ELIGIBILITY & AVAILABILITY

Currently residing in Ireland on a Stamp 1G Graduate Work Permission, granting immediate and unrestricted eligibility for full-time employment in Ireland. Available to start immediately.
